LATEST SUBMISSION GRADE 100%

1. Which of the following statements is true?

1 / 1 point

Once you have begun a file in emacs, you cannot edit it in vi without running a conversion program first to strip out embedded information in the file

Once you can go back and forth between editors as much as you would like without a conversion process

Once you have begun a file in vi, you cannot edit it in emacs without running a conversion program first to strip out embedded information in the file

Correct

Both editors do not embed any special information, so any text editor can be used on a file

2. Which of the following methods can be used to produce a file with 3 lines in it? Select all answers that apply.

1 / 1 point

\$ echo line one > myfile

\$ echo line two >> myfile

\$ echo line three >> myfile

Correct

This option works

\$ echo line one > myfile

\$ echo line two > myfile

\$ echo line three > myfile

Correct

This option works

\$ cat << EOF > myfile

> line one

> line two

> line three

> EOF

\$

Correct

This option works

\$ echo -e "line one\nline two\nline three" > myfile

Correct

This option works

3. Which statement is true?

1 / 1 point

emacs involves switching between command and insert mode by hitting the Escape key

nano involves switching between command and insert mode by hitting the Escape key

ed involves switching between command and insert mode by hitting the Escape key

vi involves switching between command and insert mode by hitting the Escape key

Correct

vi has these command modes

4. Which pair of editors has partisan advocates who tend to wage war over which is better than the other?

1 / 1 point

gedit and emacs

vi and nano

pico and nano

vi and emacs

Correct

vi and emacs have very partisan advocates who waste their time fighting

5. Which editor can always be found installed by default on virtually any Linux system?

1 / 1 point

WordStar

emacs

kwite

libreoffice

vi

Correct

vi can be installed with a very small size and is always available
